## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: Fig. 2, #50. This objection may be obviated by changing "52" on Page 9, line 9, to "50". A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: Image processor 10 on Page 9, lines 23 and 24 should be changed to image processor 61. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Motamed (US Patent 6,327,047). Motamed discloses a method for calibrating a scanner being coupled to a host computer (Fig. 1A, title, and col. 1, lines 19-34) comprising: retrieving operation data from a memory element (col. 1, lines 25-28), evaluating the data for degradation in the operation of the scanner, and calibrating the scanner to overcome the degradations (col. 1, lines 19-34).

*Allowable Subject Matter*

4. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 2, prior art does not specifically disclose or fairly suggest operational data including information obtained from previous scans and calibrations in combination with all the limitations in the claim and base claim.

Regarding claim 3, prior art does not specifically disclose or fairly suggest calculating the percentage of change between past and present operational data in combination with all the limitations in the claim and base claim.
